CLP Regulation – Reporting of substances in the classification and labeling inventory

Dear Mr/Mrs XYZ

The CLP regulation is a new EU legislation regarding the classification, labeling and packaging of substances and mixtures. An essential part of the CLP regulation (Article 39 to 42) is the reporting of substances in a new classification and labeling inventory. Manufacturers and formulators who are not resident in the EU and want to introduce substances or mixtures in the EU have to make the required information (such as a IUCLID data set) available to their EU Only Representative who is obliged to submit the notification.

In order to secure a smooth business process after 1st December 2010 we kindly ask you to confirm that all products you deliver to **Würth International AG and Adolf Würth GmbH & Co. KG** only contain substances that your Only Representative has registered.

For this purpose we kindly ask you to complete the lower part of this letter and to return the completed document by **13 August 2010 to the fax number +41 81 558 13 13**.

Thank you very much for your support in this matter.

Kind regards

Würth International AG

Adolf Würth GmbH & Co. KG

Gerd Rössler
Managing Director

André Spörl
Head of Hazardous Substance Management
