Registration of cosmetic products for Würth – further action

Dear xy

As you were informed at the beginning of 2013 all cosmetic products which are put on the market within the European Union must be registered in the registration portal of the European Commission for cosmetic products (CPNP) no later than July 10th 2013.

You have opened up an account in the CPNP and also a so-called “sub account” for your suppliers. The suppliers will log into this sub account and enter the required information. The group suppliers have been informed about their duties and will proceed with the registration as agreed upon.

Attached you can find an Excel File with a list of all chemical products you source from group suppliers. You will be informed via mail when a supplier wants to enter their information into the CPNP.

Since Würth is the company placing the product on the market, you have to make sure the suppliers have entered the required information about **all** your cosmetic products.

Please feel free to contact me if you have any questions.

Best regards

Würth International AG
