Not authorized biocidal substances

Dear Mr. Carbon

According to the implementing decision 2014/227/EU from April 24th, 2014 the biocidal substances listed in the Annex to this regulation for the product types specified therein have not been approved.

Biocidal products with primary function, which contain these biocidal substances, can still be put on the market until May 15th, 2015. So called "Treated Articles" containing these substances can be sold until March 1st, 2017.

Please inform us immediately if any products delivered to Würth contain one of the mentioned substances and inform us until when you will replace it with an authorized substance.

Thank you for your support.

Kind regards

Würth International AG
