### **Information on the REACH (SVHC) Regulation**

Dear Sir or Madam,

Article 33(1) of the REACH Regulation (EC) No. 1907/2006 requires all companies to disclose information on substances of very high concern (SVHC) contained in products at a concentration of more than 0.1 % w/w (mass percent) in the course of trade.

As a downstream user we are in constant contact with our suppliers to make sure that the substances contained in our products are registered or exempt from the registration requirements. We closely monitor changes to the so-called candidate list (including Annexes XIV and XVII) and are anxious to avoid the use of such substances in our products.

Should a product still contain a substance from the current candidate list (SVHC) at a concentration of more than 0.1 % w/w, please find the corresponding information on our delivery note.

Sincerely yours,

Würth International AG

Heiner Faust  
Managing Director

Angela Graf  
Head of Product Compliance
